

AUTOMOBILE NEWS OF INTEREST TO THE COUNTY MOTORIST

HUNSAKER MOTOR SALES NOW AGENT OF FRANKLIN CAR

Name of Dort Motor Sales is Changed With Addition of New Line.

The Dort Motor Sales Co., for some time located at 222 Hull alley, has taken on the agency for Franklin automobiles and will henceforth be known as Hunsaker Motor Sales. A. H. Hunsaker is president and manager of the new organization.

The Dort line will be maintained to cater to the growing demand for cars in its popular-price class. The Franklin is a genuinely important addition, however, because of the high standing this widely known air-cooled automobile enjoys and because the Hunsaker local service station will be fully equipped to render complete repair and parts service to Franklin owners.

In line with the announcement of the local reorganization, interesting news comes from the Franklin factory at Syracuse, N. Y., relative to the line Mr. Hunsaker and his associates will feature. The factory statement dated July 10 reads as follows:

"Development of the production model of the Franklin 1932, planned for the market in 1933, has been concluded and within the last two weeks the car has been exhibited privately at the factory to Franklin dealers from all parts of the country.

"Approval of the four has been expressed unanimously from the standpoint of performance, construction and appearance, on which comments were invited by the Franklin company. While no body types have been shown to the public up to this time, the chassis on view at the company's offices has been inspected by hundreds of visitors.

"It is said that this new Franklin 1932 four-cylinder model will prove a revelation in efficiency of performance and low upkeep cost.

MARION MOTOR CO. OPENS NEW SHOPS

Garages Opened at Fairview, Mannington and Worthington This Week.

Three new garages, one at Fairview, one at Worthington and one at Mannington, were opened this week by the Marion Motor Co., 410 Ogden avenue, the new owner of the McCray garage interests.

The garage at Fairview is to be known as the Hamilton & McCray Garage, that at Worthington as the Worthington Garage and the one at Mannington as the Main Street Garage. Oren Bell of this city will be manager of the Mannington shop.

The Marion Motor Co. has been in business here for about three years. Until its purchase of the McCray interests, it was known as the Apperson Motor Co. The firm began to enlarge its field, however, and desired a more general title so "The Marion Motor Co." was chosen. All garages in this chain will handle both Apperson and Chevrolet automobiles, the latter machine being placed on the sales list at the time of the McCray purchase.

The Marion Motor Co., has a strong organization and is doing a good business. It has the following officers: J. Blaine Moore, president; and John F. Cole, vice-president; and R. A. Johnson, secretary-treasurer.

MERITS OF OAKLAND CAR BRIEFLY GIVEN

You may not be mechanically inclined or know much about motor construction but the merits of some of the Oakland motors parts are so obvious that we are going to point out to you some of these features.

One of the most important developments in motor construction has been the producing of a new special bronze backed, interchangeable bearing for the crankshaft. The reason this particular bearing is very important development is that it is constructed of such material, by a new method and in such a careful manner as to minute measurements that the bearings are absolutely interchangeable.

These bearings because of being made by a special process, will, with proper lubrication, undoubtedly last without adjustment or replacement for at least 50,000 miles, if not for the entire lifetime of the automobile. This is a feature heretofore unheard of in engine construction in an automobile at the price of the Oakland Six; in fact, at the present time there is just one high priced car the engine of which contains this type of bearing.

Another very important installation in the New Oakland Six is the silent Morse chain drive for camshaft and generator.

Timing gears is considered the best because the chain is adjustable, gives much longer life than timing gears, and remains quiet for the entire life of the chain. You will find this equipment in the Cadillac and many other higher priced cars.

The two items above mentioned are only a few of the very important features that are contained in the Oakland Six. These do enhance strongly the unusual value in the Six-4 model.

We guarantee the Oakland for 15,000 miles against excessive oil in the combustion chamber. No other car is doing this today. We want the opportunity to prove all these claims.

FINE CAMP PROGRAM NOW BEING ARRANGED

Camp Director George Hartrick of the Y. M. C. A. boys summer camp, returned from Camp Woods today to meet the campers at a joint meeting of boys and parents, that is called for 7:30 tonight at the Y.

Mr. Hartrick called this meeting before leaving for camp and is very anxious for all of the boys who are going to attend Camp Woods, to be there tonight with their parents. The Director wants to meet the boys and parents before going to camp and he wants the boys, as well as the parents, to become familiar with the camp rules.

Hartrick announced today that the camp was an ideal one and that the tent leaders had been working hard getting things ready for Monday morning, when the army of boys will arrive there. The tents were set up yesterday and the grounds were cleared off and the trash was burned. Work was started on the diving board and pier at the swimming hole and it is expected that the work will be completed today.

The boys will leave the "Y" building early Monday morning and make the trip in automobiles to the Buckhannon river resort. It was announced that twenty-five boys would leave Monday and nearly twice that number will go for the second two week period.

Jack Hardesty, the camp cook, is already in camp and the boys are sure of getting plenty of well cooked food. A regular menu is being worked out and the boys will have a well regulated diet, while in camp.

43 MILES MADE ON ONE GALLON

Chevrolet Wins Prize for the Least Gas Consumption in Test Run.

A prize of \$50 was won by B. F. Latham of Davenport, Wash., for the least gas consumption in a run to Spokane, a Chevrolet automobile in a run to Spokane. It was awarded by the Culton-Moylan-Reilly Auto Co., at whose salesrooms in Second avenue in Spokane the run ended the day before. Mr. Latham covered the thirty-eight miles between Davenport and Spokane on seven gallons of gasoline, according to sealed tests made by the mayor of each terminal. The consumption was at the rate of forty-three miles to the gallon.

There were twelve contestants all from eastern Washington and northern Idaho. They covered a total of 789 miles at an average gas consumption of a gallon to 33.55 miles.

Forty dealers from the Inland Empire attended the Chevrolet dealers' convention in Davenport. Business was discussed and an address was made by William Vreeland, a factory representative, of Oakland, Calif., who presided.

This phenomenal average record was made over all kinds of roads—good, bad and indifferent—leading from every direction and therefore shows the enviable economy of Chevrolet in a most forceful way.

ADMINISTRATOR NAMED.

TOKIO, July 28.—(By The Associated Press.)—Mr. Chuichi Ariyoshi, Governor of Hondo, has been appointed civil administrator of the Korean government in succession to Dr. Rentaro Mizuno, who was appointed minister of home affairs in the Kato cabinet.

According to a Seoul message there has been a movement in Korea to have a national of that country appointed in succession to Doctor Mizuno, the Koreans de-strained impulses "to hit somebody" at least so police records clarify that nothing would facilitate the assimilation of the Koreans more than the appointment of one of them to the post.

Governor Ariyoshi formerly was director of the general affairs bureau of the Korean government.

DURANT FIRM TO PUT OUT NEW CAR

NEW YORK, N. Y., July 29.—The addition of a popular priced six cylinder motor car to the line of the Durant enterprises is announced today by W. C. Durant, President of Durant Motors, Inc.

The new car, to be known as the "Flint," will be ready for public inspection about September 15th, and for deliveries January 1, 1933. The price has been established at \$1180. The manufacturing company, the Flint Motor Company, will have capitalization of \$6,000,000. Application for its charter was filed at Lansing, Michigan today.

The "Flint" is named for the city of Flint, Michigan, where the main manufacturing plant will be located. Thus is fulfilled a promise made by Mr. Durant at the inception of Durant Motors, Inc., a year and a half ago, when he announced that one of his manufacturing plants would be located in Flint, his former home. The promise was made in response to an appeal contained in a petition signed by thousands of Mr. Durant's former townspeople.

For convenience in supplying

the eastern markets, the "Flint" will also be manufactured at Long Island City, N. Y., in the plant about to be vacated by Durant Motor Company of New York, Inc.

The latest Durant is a refinement of the so-called "Chrysler" car, which was acquired in the purchase of the Willys Corporation. As redesigned, the car will be somewhat larger than the original "Chrysler" model, but will retain the seven bearing crank shaft and other special features for which this car is noted. It is a matter of record and interest that in the designing and engineering work on the "Chrysler" car over \$2,000,000 has been expended.

Only Oakland Guarantees Performance—in Writing

Oakland is the *only* maker of motor cars that backs every engine it builds with a written 15,000 mile performance guarantee.

What better proof of the sterling goodness of the New Oakland engine could anyone ask?

Oakland set out to build the finest light-six that engineering talent could devise or careful and exacting manufacture could produce. And now—Oakland's written guarantee is your assurance that it has accomplished this purpose.

This guarantee *protects* you; the new Oakland car will do infinitely more—it will satisfy you completely in every minute thing that you would demand from a fine motor car. In justice to yourself you should investigate this New Oakland carefully, once you decide to spend around a thousand dollars for a motor car.
